

## Wired Network Diagram

## Wired Networks

- Place a 1-port device server on every CNC or run several CNC's from any combination of 4, 8 or 16-port device servers
- Eliminate long RS232 cables by distributing the device servers throughout your shop
- Load to memory or drip feed long programs
- More economical than wireless
- Ethernet distance of up to 100 meters
- The most reliable file transfer solution

## All of our serial solutions

- 5 year warranty from the product manufacturer
- Drivers for Windows 7, 8 & 10
- Optical isolators available for problem communications
